

# NEW RANGE H BAYS ARE OPEN

Four new shooting bays have been constructed at TRPC and are now open to the membership for use. The bays (1,2,3, & 4) are collectively designated Range “H”, and are intended to provide members with a private shooting experience unlike our other long span ranges. The range will provide shooting up to distances of either 25 or 50 yards, and all are approximately 40’ wide.

Range rules are posted and identical to Ranges A1, A2 and B. The new range is intended for .22 LR rimfire and pistol caliber cartridges only. **No centerfire rifle cartridge firearms or shotguns are permitted.** All TRPC general range and safety rules apply to the use of Range H. Rules are posted at the clubhouse, front gate and on the website. Remember that all targets must be placed directly at the impact berm, shots must directly impact the impact berm and shots into side berms are not permitted.

Target frames have been placed on each range and may be used for paper or stick on targets. Also, rubber plates have been provided to imitate steel shooting. Members should bring their own white paint so hits can be recorded.

Getting there – Range H is accessed via the western side road adjacent to the A2 parking area. Look for the sign. Note that the road is narrow and cannot accommodate two vehicles the entire way. Please use courtesy and give way to vehicle exiting Range H. The Range H is directly north of ranges A1, A2, and B. There is plenty of parking. DO NOT attempt to access or exit Range H from Range E/F. This is entirely prohibited.

Look for some more amenities for the range in the near future.
